Instance Method

copyItem(atPath:toPath:)

Copies the item at the specified path to a new location synchronously.

iOS 2.0+ iPadOS 2.0+ macOS 10.5+ Mac Catalyst 13.1+ tvOS 9.0+ watchOS 2.0+ visionOS 1.0+

```
func copyItem(  
    atPath srcPath: String,  
    toPath dstPath: String  
) throws
```

Parameters

srcPath

The path to the file or directory you want to move. This parameter must not be nil.

dstPath

The path at which to place the copy of srcPath. This path must include the name of the file or directory in its new location. This parameter must not be nil.

Return Value
